Microsoft Fabric

Accelerate your data platform modernization with Microsoft Fabric

A unified analytics platform for AI-driven insights

Modernizing your data platform is essential to building a future-ready enterprise in today's light-speed digital world. Microsoft Fabric is a unified, cloud-based analytics platform that turns legacy infrastructures into agile, scalable solutions. Combining powerful tools like Power BI, Azure Data Factory, and Azure Synapse empowers organizations to enhance data governance, drive impactful analytics, and fuel AI-powered innovation.

Built on an open, lake-centric architecture, Microsoft Fabric seamlessly integrates across the Microsoft ecosystem, including Office 365. Its all-in-one design simplifies complex data workflows, unlocking actionable insights and delivering sustainable growth. You can confidently lead in a rapidly evolving digital industry with Microsoft Fabric.

Why clients are choosing Virtusa?

Transforming expertise

With transformation ingrained in our DNA, our Fortune 500 clients have realized **30%** greater cost savings in comparison to industry standards.

Business outcome focus

We leverage Virtusa IP and cloud-native tools for **40%** faster migration, ensuring measurable business results.

Certified experts

Our Microsoft-certified experts provide the guidance needed to maximize the value of your Microsoft Fabric investments.

Rapid migration

Virtusa's in-house accelerators enable fast and seamless migration to Microsoft Fabric, ensuring minimal disruption.

> *Virtusa's approach has been instrumental in driving both speed and value for our digital transformation efforts.* **- Fortune 500 Client**

Data platform modernization on Microsoft Fabric

Smart migration

- Completely automated approach (migration planning, execution and testing)
- Optimal TCO (effective, cheaper, faster and better)
- Democratization and seamless

DataOps and security

- Cloud platform configuration
- Data onboarding
- DataOps
- Data governance operations
- Metadata operations
- Data security

Data decisioning and monetization

Static data monetization
Data solutions: Data decisioning, Data as a service, Data products/ apps, and Data visualization

Data ecosystem: Partnerships (external), Data marketplace, and Data exchange/sharing

Dynamic data monetization
Identify and build new use cases and revenue models

AI-based industry use cases

Greenfield implementation

- Build a modern data platform
- Develop new data pipelines
- Data integration with downstream systems

Data platform governance

- Data quality
- Metadata management
- Data security and access control
- Enable a single source of truth for analytics and visualization
- Cost governance
- Data lineage
- Data cataloging

Future-proofing

- Data fabric
- Data mesh
- Lakehouse
- Advanced analytics and AI/ML enablement

Partnership highlights

Virtusa - Microsoft Azure Cloud partnership highlights

Virtusa has successfully helped **50+ global clients** spanning **200+ cloud engagements**. As a Microsoft Cloud Gold partner, Virtusa remains a leading Azure, M365, and O365 solutions implementer and can help accelerate Cloud migration and remote Cloud management.
