Cloud migration with Virtusa and AWS

Accelerate your path to the cloud, innovate faster, and outperform the competition with Virtusa's proven migration framework and tools

Why migrate to the cloud now?

In today's fast-paced digital landscape, moving to the cloud is no longer optional—it's essential. Cloud migration empowers companies to:

Outpace competition
by enabling rapid, on-demand scaling to respond to market needs

Save 20% - 50% on TCO
through streamlined, cost-effective infrastructure solutions

Enhance agility
with flexible, up-to-date technology platforms

Your path to the cloud with Virtusa

Ready to start your cloud journey? *Virtusa offers a comprehensive accelerated cloud readiness assessment plan to guide you every step of the way*

Ask us how?

Virtusa's structured approach to cloud adoption ensures a smooth, swift, and strategic transition to the cloud with our four-pillar framework leveraging Virtusa's IP accelerators, cloud-native and hand-picked partner tools

1

Assess
Tailored assessments and business architecture planning to define and prioritize migration phases

2

Foundation
Establish secure, scalable foundations with robust blueprints, skills development, and compliant landing zones

3

Migrate and innovate
Proven high-velocity, iterative migration methods that ensure operational continuity

4

Manage
Post-migration support with continuous optimization to maximize cloud performance and minimize costs

Why choose Virtusa?

Trusted Cloud Migration partner for Fortune 500 Companies

Virtusa is the choice partner for over 50 Fortune 500 clients. Our expertise and reliability make us the trusted advisor in cloud transformation, consistently achieving high productivity and operational efficiency

Engineering heritage
Decades of experience in designing high-quality, future-proof products and platforms

Outcome-driven results
On average, clients see savings of 30%+ and efficiency gains of 25% - 40% by leveraging Virtusa's optimized migration strategies

Accelerate with Virtusa's exclusive migration tools
Our suite of proprietary and partner tool accelerators makes migrations fast and seamless

CloudGenie
A non-intrusive and rapid formulation of cloud strategy based on the current IT landscape

CloudHedge x-Ray
for automated discovery and assessment

TF Studio for IaC blueprints
30% faster infrastructure provisioning

GenAI for modernization
AI-driven code and API generation to re-engineer legacy systems as microservices

vGovern for cloud governance
Optimizes cloud operations across FinOps, SecOps, and CloudOps

Virtusa and AWS: A partnership that drives success

Virtusa has the credentials, expertise, and recognition to help enterprises unlock the full potential of AWS Cloud.

AWS partner

Certified Solution Partner for AWS Competencies like AWS Migration, AWS DevOps, Data & Analytics, Financial Services, LifeSciences, HealthCare, SaaS, and Digital workspaces programs

Award-winning expertise

AWS "Partner of the Year," "Industry Partner of the Year," and "Data and Analytics Partner of the Year"

AWS service validation partner

Amazon Redshift Delivery, Amazon EKS Delivery, Amazon ECS Delivery, Amazon EMR Delivery, Amazon Connect Delivery, AWS Outposts Ready Product, Amazon EC2 for Microsoft Windows Server Delivery

Over 2,350 AWS certifications

With a talent of 2500 practitioners and 2350+ certifications

Success stories:

Real results for leading brands

40% productivity boost for a U.S. financial services company
Migrated 44 on-premises Oracle databases to AWS RDS, reducing operational challenges and enhancing SME productivity

60% reduction in Data Centers for a media giant
Reduced on-premises data centers from 17 to 9, decommissioned 375+ servers, and re-architected 55% of applications. Achieved a 70% productivity increase with Agile DevOps, reduced roll-out time from 45 to 7 days, and implemented ~75% automation.

90% cost savings for a media company
Designed an extendable web application framework using AWS Serverless Architecture, cutting costs by up to 90%, eliminating nearly all server reliance, and enabling faster development cycles
